GULAFSHAN BANO

Lucknow, Uttar Pradesh, India

+91-7376869786 gulafshanbano05@gmail.com Gulafshan Bano Gulafshan Bano

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Data Science and Artificial Intelligence, with an 8.7/10 CGPA and expected graduation in May 2027. Skilled in Python, SQL, data analysis, data visualization, and machine learning, with hands-on experience building AI applications and multi-agent research workflows. Strong foundation in data preprocessing, exploratory data analysis, and model evaluation, with a focus on developing data-driven solutions to real-world problems.

EDUCATION

Bachelor of Technology (B.Tech.) in Computer Science and Engineering - Data Science and AI *2023 – 2027*

Integral University, Lucknow

CGPA: 8.7

SKILLS

Programming Languages - Python, Java, SQL
Data Analysis & Visualization - Pandas, NumPy, Matplotlib, Seaborn, EDA, Data Cleaning, Data Visualization
Machine Learning - Scikit-learn, Logistic Regression, Random Forest, Feature Engineering, Model Evaluation
AI & Generative AI – LangChain, LangGraph, RAG, Multi-Agent Systems, Prompt Engineering
Frameworks & Tools - FastAPI, Streamlit, Jupyter Notebook, MySQL, Git, GitHub, VS Code

INTERNSHIPS

Sipher Web Pvt. Ltd *May 2026 – July 2026*

- Developed a multi-agent AI research workflow using Python, LangChain, LangGraph, and Streamlit for automated information retrieval, research synthesis, report generation, and citation handling.

Sipher Web Pvt. Ltd *May 2025 – July 2025*

- Applied Python, Pandas, and NLP techniques for text preprocessing and sentiment analysis, exploring feature extraction and machine learning-based text classification.

PROJECTS

AI Research Studio- Multi-Agent AI Report Generator | *Live demo*

Tech Stack: *Python, LangGraph, LangChain, Groq, Tavily, Streamlit*

- Developed a multi-agent AI application for research collection, analysis, report generation, fact-checking, and citation generation.
- Built a Streamlit application with downloadable text reports and an automated research workflow.

Google Play Store Data Analytics

Tech Stack: *Python, Pandas, NumPy, Matplotlib, Seaborn*

- Performed exploratory data analysis on Google Play Store data to examine app categories, ratings, installs, reviews, and pricing.
- Cleaned missing and duplicate data and created visualizations to identify trends and patterns.

Disease-Prediction Model

Tech Stack: *Python, Pandas, Scikit-learn, Matplotlib*

- Developed Logistic Regression and Random Forest models to predict heart-disease risk using patient-related data.
- Evaluated model performance using a confusion matrix and classification report after data preprocessing and feature scaling.

ACHIEVEMENTS

- **IBM Certificates** -Build Your Chatbot | Statistics 101 | Data Visualization with Python | Cloud Application Developer | Data Science 101 | Artificial Intelligence Analyst | Data Privacy and Fundamentals
- **Event Management Coordinator | Fiesta 2026** -Coordinated and supervised 10+ events at the Department of CSE, Integral University.
- **Volunteer | Fiesta 2025 -** Supported 10+ event activities, contributing to event coordination and execution.
